

BY THE NUMBERS

Qualia Marketplace

We surveyed 100+ Qualia Marketplace users nationwide to learn in-depth about how Marketplace has transformed the way they manage vendors. The numbers shared here are the results of this survey.

Process more title searches faster with centralized, easy-to-use order placement

Processors can handle an average of **7 more orders** per month

Turn time per closing was reduced by an average of **4 days** with Marketplace

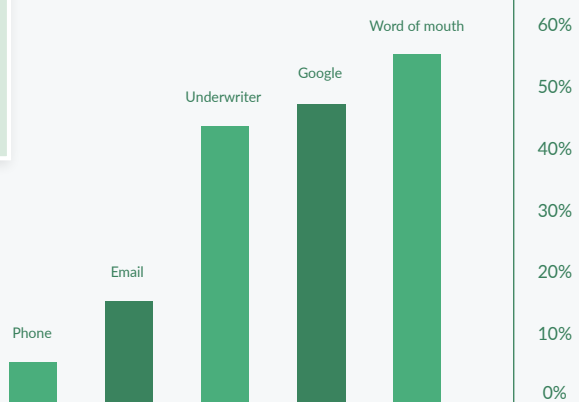

Reducing the time it takes to order and receive back title searches and other services makes a meaningful difference on your time to close.

Imagine how much more business you could take on if your teams were able to increase output by 7 more orders per month per processor without the need to hire additional personnel.

Log in to *one system* to search for high quality vendors

Prior to Marketplace, survey respondents relied on word of mouth, Google, and/or their underwriter to find high quality vendors

Reduce the amount of time your team spends inputting title search information by 80%

Processors enter data **5x faster** with Qualia Marketplace

If you're processing 500 closings per month and saving 40 minutes per file, your team could save 333 hours per month.

Many respondents to the survey reported they've completely eliminated the time it takes to enter this information because requirements and exceptions are automatically added to the commitment.

Improve quality of service with more predictable, on-time closings

93% percent of survey respondents reported they were confident in the predictability of vendor turn times in Qualia Marketplace

Lenders, real estate agents and consumers all expect predictability when it comes to closing timelines. To deliver best-in-class service, you need vendors who are able to provide predictable turn times on closing services.
